## Ms. Kleen sez....

Welcome to a new feature in the Lavender Letter. Ms. Kleen will bring you cleaning tips each month, tips to make your life at home easier.

Is your microwave looking pretty awful inside? Covered with all kinds of splatters? You're probably thinking it's going to be pretty tough to clean, going to have to really scrub to get that stuff off. Right?

There is an easy way to clean the inside of your microwave! Steam clean it! Add 4 tablespoons of lemon juice to 1 cup of water in a microwave-safe bowl or cup. Set your microwave cooking time to 4 minutes, and then let it set in there for a couple of minutes more when it is done. The steam condenses on the inside walls of the microwave, softening the food particles making it easy to just wipe it clean with no effort.

## Health Spotlight....

### SLEEP DEPRIVATION AND WEIGHT GAIN

Gaining weight and don't know why? The culprit could be your bedtime. If you don't get enough sleep at night, it doesn't matter what you eat and how much time you spend on the treadmill. If you are exhausted, your diet just won't work. Sleep deprivation affects the hormones that control appetite and weight reduction.

This is what happens if you don't get enough sleep at night:

\*\*You'll eat more during the day in an attempt to stay alert.

\*\*The hormones that control appetite and weight reduction won't function properly.

\*\*Your resistance to insulin will be increased, which interferes with your ability to digest and process carbohydrates. And that can make you gain weight.

Sleep is not a luxury! If you don't get enough sleep every night, it could be as damaging to your diet as splurging on ice cream every night. And crashing on the weekends to make up for a weekday sleep deficit just won't cut it.

Also, researchers at Brigham and Women's Hospital in Boston have determined from a study they have done, women who have a sleep imbalance - sleeping 5 or less hours a night, or nine or more a night - run a greater risk of getting heart disease than those who sleep 8 hours a night.

Eight hours is the ideal amount of sleep. It might also be the secret to living a long and healthy life.
