research and the plastic spoon syndrome

by Howard Kolus

Paul Biebel hunched his chair forward, his demeanor even more intense than usual when he talks of his vocation-avocation—biology. He was making a point about the necessity for faculty research and the difficulty of convincing those holding the purse strings, namely federal and state agencies, to drop a few more shekels to the campuses rather than curtailing existing funds as has lately been the trend.

It was really at the end of the conversation, nearly as an afterthought when Biebel, chairman of the College's biology department, leaned close and asked in an almost confidential manner whether the listener was aware of how the Gypsy Moth came to ravage East Coast forests.

Well, sure, wasn't it in the late 1800s that some scientist in Massachusetts

allowed a few of the little devils to escape and they've been spreading ever since?

What's an amateur know anyway . . . Biebel took the opportunity to shed a bit of light.

"Gypsy Moth larvae were brought from Europe by a naturalist who was fully aware of the danger if they escaped. He took every precaution, but nevertheless several got away out a window. He quickly sought help and gathered up as many as he could find. But some were still missing and so he went to the legislature asking for \$100 to hire additional men. The response? '\$100 to find a few caterpillars? No!'"

For want of a nail . . .

Well, the battle isn't lost yet, but as Biebel and other scientists have no hesitancy in telling anyone within earshot,

continuing support for research in all fields, most of which is unintelligible to the layman, is vital if we are to solve contemporary technological-scientific problems and maintain acceptable living standards.

Dr. Biebel describes the "plastic spoon syndrome" encountered when seeking support money. That is, how do you convince those who must be convinced of the need for this or that study?

"You're not designing a plastic spoon that can be marketed next month," he says. "In our business you don't know if you're going to get a spoon or fork or what. There is no practical, immediate result, but you do know it could be important in the future."

Opposition to research is sometimes encountered from students, those who are shut out from a particular class because it filled before they got there

and expect another session to be added with the additional teaching load shouldered by a professor who accordingly must let his research slide.

Dr. Biebel emphatically turns down any such proposal.

"We're not teaching 19th century biology," he retorts. "Research is the subject, that's all. If I weren't doing research I would not be doing by job."

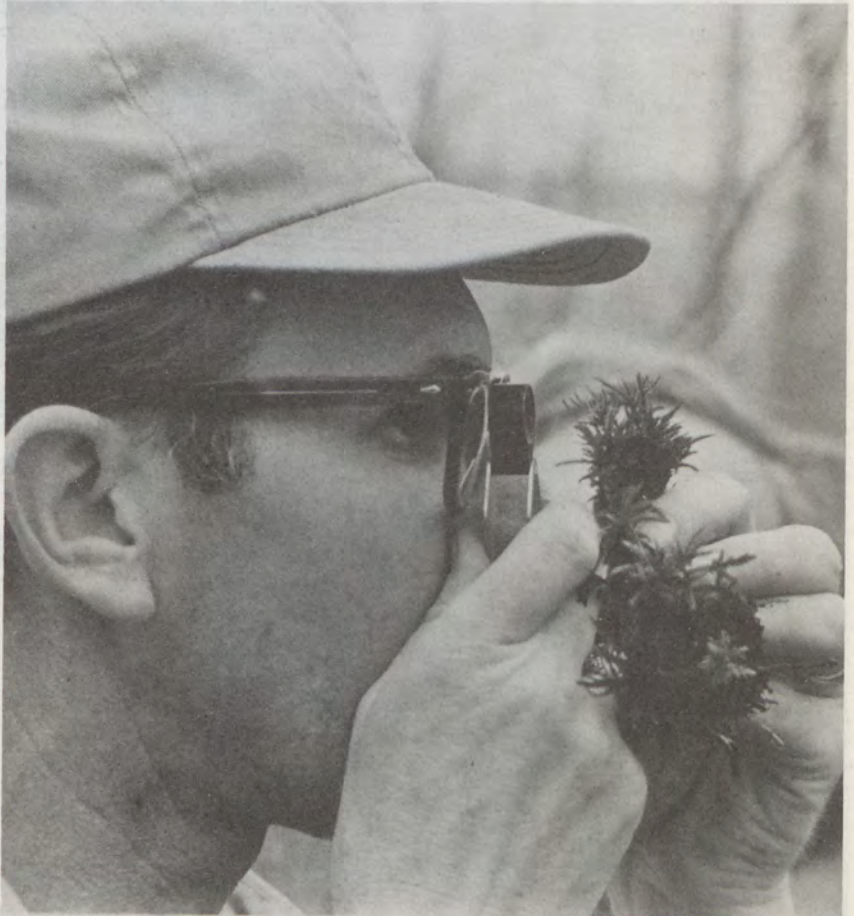

"It's difficult to get people, students, really involved when you're not really involved yourself," he adds, "and involvement is the kind of thing that education is all about. There's an excitement in defining a problem and then setting about solving it. And this problem solving ability applies, whether we want to admit it or not, to every aspect of life. However, funds are drying up for research at all colleges and universities, including Dickinson."

As an example, Biebel cites the College's three-year participation in a summer biology research program funded by the National Science Foundation. Though application was made for the summer of '73, word came back that while the College's proposal was again worthy of support, the money just wasn't there.

Prof. Richard M. Lane, an embryologist who has participated in the program since its inception at the College, noted that only nine schools in the state are currently funded in comparison with some 100 during previous years.

"Most of our work dealt with blocking development of the immune system," he explained recently. "We were attempting to introduce tolerances for skin grafts. Last summer, the final period for which we received support money, we completed a quantitative study of how much skin applied at what time is necessary to achieve tolerance."

The College Science Improvement Program, (COSIP) another federal science effort, has also felt the sting of the budget axe, though in somewhat different fashion. COSIP offered funds basically for operating purposes whereby colleges and universities could

*Dr. Paul Biebel (top) examines a specimen at the Florence Jones Reineman Wildlife Sanctuary, where he discovered the rare desmid *Cylandrocystis debaryi*. It was thought to be found only in Finland. The alga (bottom) is shown in its dormant zygospore stage, magnified 800 times. His full study of the green pond plant was reported in *Nova Hedwigia* after his presentation to the First International Symposium on Desmids in 1971. Curtailing federal funds may cause basic research in many areas to cease.*

hire teaching assistants or purchase research equipment. Biebel relates that the College's application for fiscal 73-74, along with many from other schools, found itself caught up in a bureaucratic swirl occasioned by a change in program emphasis that had not been publicly announced. Biebel says the College would never have known of the change and concomitant impounding of program funds if its Director of Institutional Giving hadn't paid a visit to Washington.

Lloyd G. Humphreys, former assistant director for education at the National Science Foundation, complained that budget cutbacks had "torn the heart" out of science education programs when he resigned in 1971.

And *Scientific American*, keeping track of trends and conditions in the world of test tubes and amoebas, takes note of the demise of the President's Science Advisory Committee, abolishment of the Office of Science and Technology and other changes in the federal science superstructure stating:

"Reorganization was only a small part of the President's attempt to 'avoid inflation or higher taxes or both' by limiting the 1974 budget . . . the actual economy achieved by abolishing the Office of Science and Technology will be small: the elimination of 389 jobs with a payroll saving of \$2 million."

The magazine, in its latest comment as of this writing, continues: "In the proposed 1974 budget the total expenditure for research and development by all departments and agencies will be increased 1.7 per cent to \$17.4 billion. For the purposes of comparison the proposed Defense budget for 1974 is \$81.1 billion, an increase of \$4.7 billion, or 6.1 per cent over 1973," adding significantly, "the research emphasis in 1974 will be on short-term results and on the technological application of scientific knowledge to social needs."

It's this change from long-range concern to the immediate and the drying up of the federal well of research assistance funds that has scientists worried.

Biebel is a phycologist, that is, he specializes in the study of algae, especially Desmids. Noting that not only NSF has been scarce with funds in recent years, but other agencies as well such as the National Institute of Health and the Atomic Energy Commission, Biebel describes the situation as "like an earthquake with aftershocks, the whole thing keeps vibrating," in turn affecting the reserves of private foundations. He then related the matter to his own teachings, two courses specifically, Non-vascular Plants (algae and fungi) and the Field Study of Plants.

"Suppose a student looks through a microscope and is caused to wonder about what he sees, his curiosity greatly aroused. With facilities and the expertise available, the College can provide the means for that student to go as far as his abilities can take him. Education is expensive and the support is declining."

Biebel's own research, over a period of nearly 20 years, resulted in the discovery of a unique alga in the College-managed wildlife sanctuary, a particular type which had been known only in Europe. Two years ago Biebel attended an international gathering of scientists in Germany presenting a report on his findings, which were made possible with the help of research grants and a student assistant.

"Much scientific research at Dickinson involves both faculty and students," Biebel said, "the latter doing anything and everything from washing equipment to conducting the entire research program themselves under faculty guidance." He adds that presently a senior biology major is engaged in an independent research project with him "actually working on one portion of a problem in an area no one has touched before."

"Problem solving and direct observation are two of the most important elements of science education and you can't expect a summary of the results of someone else's work to be satisfactory," Biebel says.

He recently discovered yet another unique alga at the sanctuary, one which was recognized in a lab behavior "as that which had been a kind of puzzle to biologists for some time and had only been seen in Finland until now."

"Probably no more than 30 persons in the world have looked upon this particular strain before. I was able to recognize it, and show the students, because I had been keeping up with research in this area and knew that it had been alluded to previously.

"However, now there's debate over whether we can afford such esoteric studies. But yet it was just such investigations which gave us the knowledge that DDT was killing off eagles."

Over in Physics, department Chairman Howard C. Long noted similar woes.

"Most of us in science want to be of help in pushing back the frontiers," he says, "and the breakthroughs eventually do occur through the piling up of individual advancements."

Long, too, lost an NSF funded program involving undergraduate research participation. After three years, the effort was concluded in July, 1971, "and now, if it exists at all," Long says, "it's funded very minimally."

Similar to the biology program, for most of its duration it was a summer operation, though it initially began as a full academic year project in 1968. Studies included work in plasma and nuclear physics by Profs. Neil S. Wolf and John Luetzelschwab in association with student assistants.

"NSF has been forced in the direction of immediate results, being told to achieve practical application of research," Long stated, noting also the delay factor expressed frequently by the scientific community. The point is made that slackening research activity won't be felt for the next five or 10 years and then, as Dickinson physicist Priscilla Laws sees it, "there won't be the necessary up to date background to draw from."

Dr. Laws, greatly interested in environmental research, has been studying

the effects of man-produced radioactivity in nature. Of her research activities she states: "I couldn't teach knowledgeably without this 'extra' preparation. It adds to the depth of a teacher, is an integral part of the profession, certainly a necessity."

Optimistically, Dr. Long viewing the situation in lengthy perspective sees hope that Washington will once again

look with increased favor upon the science community while adding that the current cutback must have originated three or four years ago "since it takes that long to turn off programs."

"Good young men and young women don't want to go into teaching unless they also have the opportunity to pursue research," he says. "I think too

that the environmental problems facing the country will force additional in depth study.

"People tend to look at technology and say 'see the problems it's brought us.' But they don't realize that it will take technology to overcome these problems as well."

"Yes, I think the tide will eventually turn again," he added. "It really has to."

sampling current research...

As a faculty member says in the previous article, "research is the subject," and although the following is not meant as a compendium of current investigations by Dickinson scientists, it does represent at least a look at the work of those with available data during this writing.

Robert S. Averback '66, assistant professor of physics will shortly undertake a project in cooperation with the Argonne National Laboratory, Chicago, to study radiation drainage in metals through Thermoelectric Power Measurements, a new way of seeking such drainage. Professor Averback, who is completing a post doctoral fellowship at Cornell and joins the College faculty next month, says his work should yield information relevant to the construction of breeder reactors for atomic power plants. Presently deterioration of reactor materials occurs during radiation drainage.

Paul J. Biebel, chairman of the Biology Department, has been investigating algae—plants that have chlorophyll but no true stems, roots or leaves—for nearly 20 years. He's currently working with the strain *Cylindrocystis*, examining differences in forms collected in various areas of Pennsylvania and New York as they propagate in the laboratory.

Priscilla Laws, associate professor of physics, is spending a year's sabbatical pursuing theoretical research into the effects of man-made radioactivity on the environment and those living in it. Specifically, she is investigating the effects of radiation from various types of nuclear power plants and that produced by x-rays. Dr. Laws is also complet-

ing a consumer manual on xray diagnosis for the Health Research Group, Washington, D.C., and is working on a technical paper for the Journal of Health Physics developing a theoretical method for setting upper limits on the risks associated with commercial xray diagnosis.

John W. Luetzelschwab, assistant professor of physics, for several years has been studying ways of determining the radioactive ion content of river waters expurged from atomic power plants in an effort to come up with a more efficient and less costly research method. Present means involve collecting large water samples later analyzed in a laboratory. Luetzelschwab's studies to date have determined that more than 90 per cent of the ions can be gathered through an "ion exchange column" which is then returned to the lab for analysis.

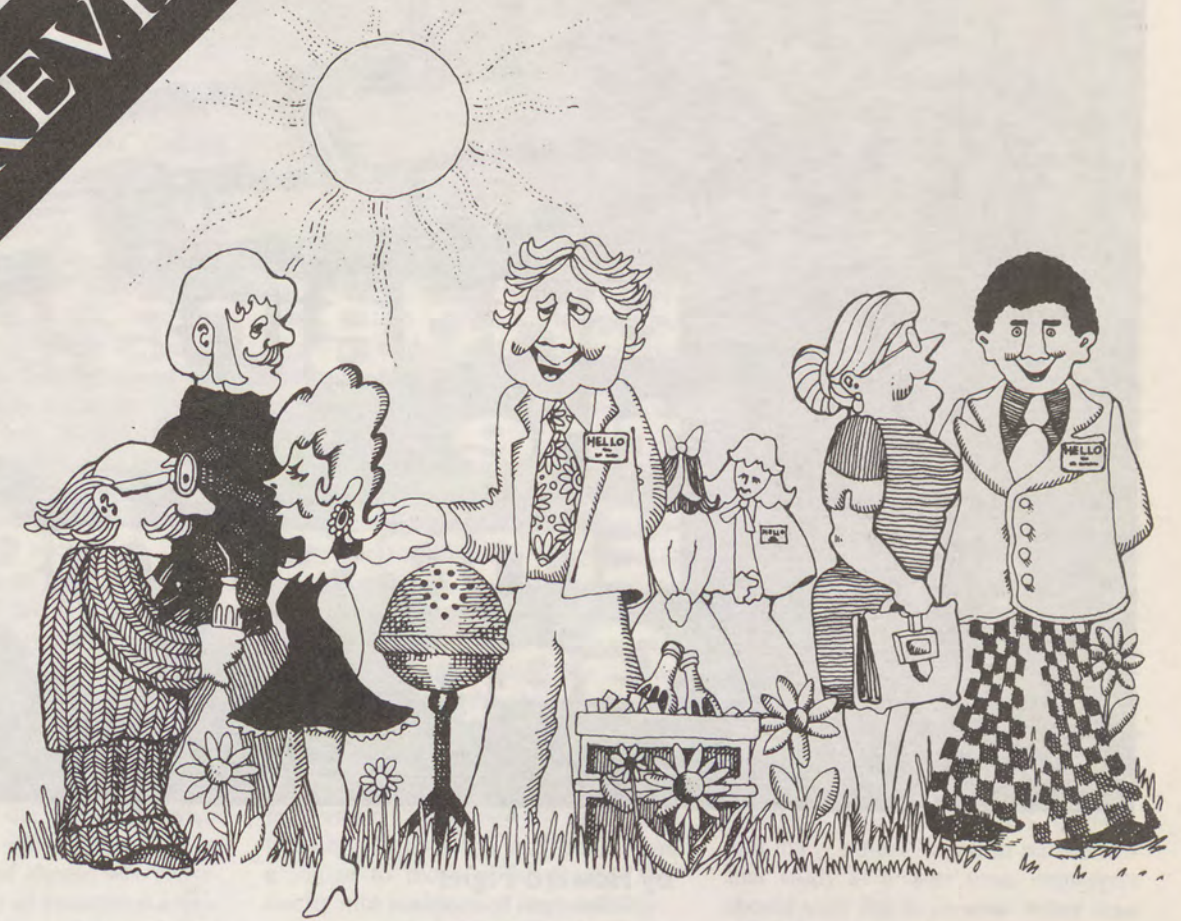

William R. Schearer, associate professor of chemistry, has developed a herbicide currently being tested by Amcham Co. The weed killer may eventually find its way into agricultural use. Professor Schearer notes that it's not as long lasting or toxic as many now on the market.

It might be noted here that the College supports faculty research via the Faculty Research and Development Grant Program providing "seed money" enabling early investigation until the larger federal or private grant is approved. The program, with grants up to \$1,400, has recently been expanded to include the sciences. Among those who have made use of its monies are Profs. William R. Jeffries, biology, working with an electron microscope at the Hershey Medical Center; Neil S. Wolf, physics, equipment purchases; Priscilla Laws, radioactivity studies and William W. Vernon, Geology Department chairman, archeological excavation.

HOMECOMING '78

PREVIEW

Someone told us that all you alumni out there are tired of Homecoming. They said that the students didn't like it either: the highbrows thought it was too corny and women said they wouldn't allow another all-male homecoming game.

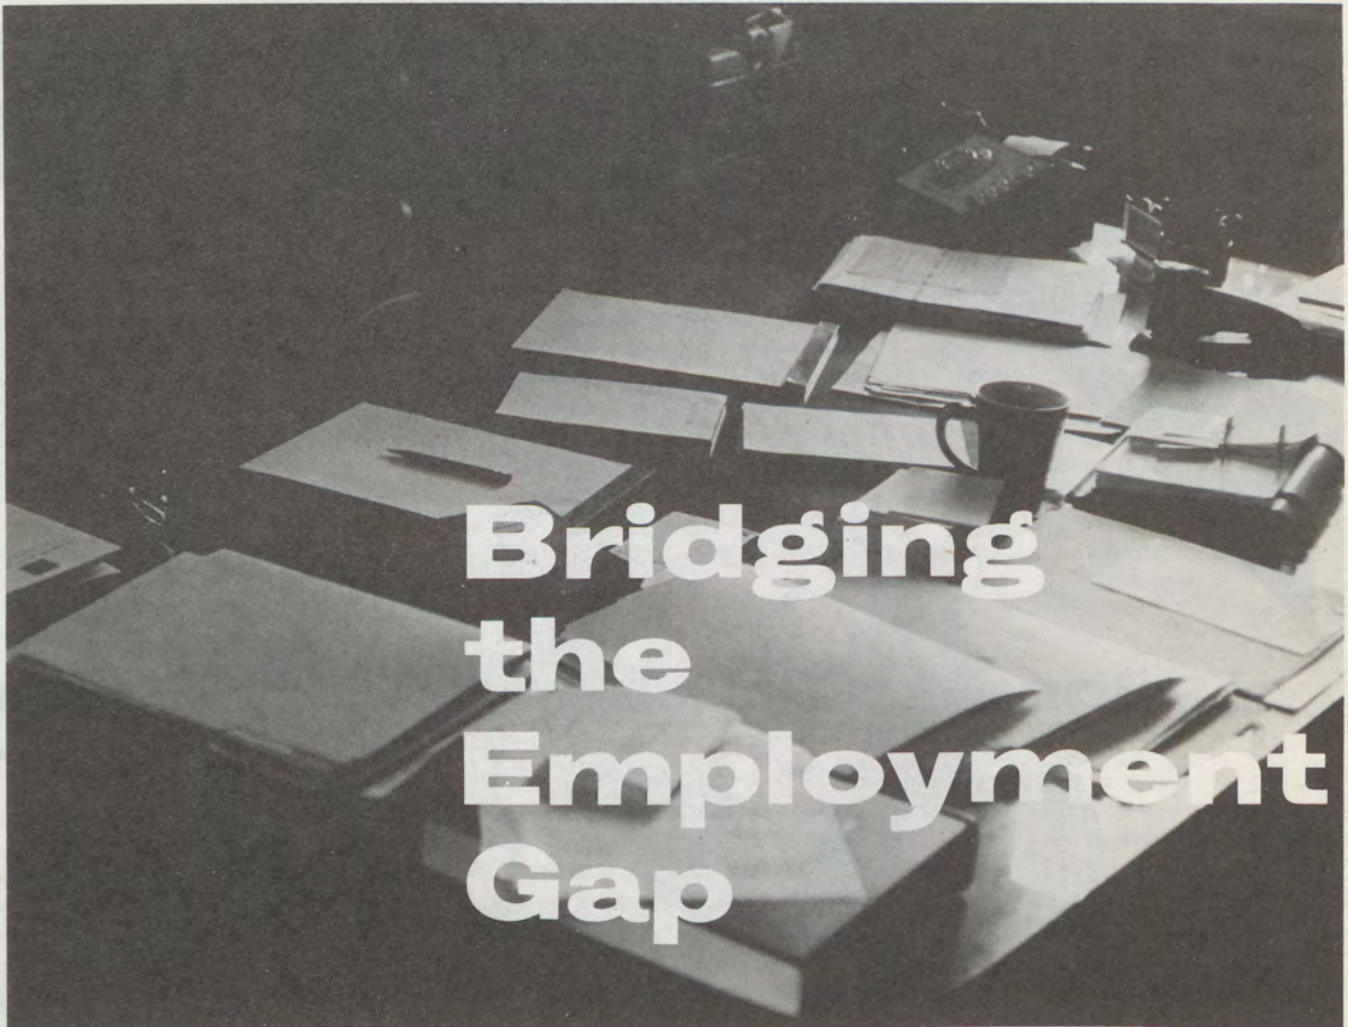

Well, we've got that all straightened out. The students have made concessions, too, like there're still no women scheduled to play Swarthmore and we're going to have a Homecoming Queen (whew!).

Yes, Homecoming's the same old thing all right. We thought you'd be glad it is. We thought you'd make a few concessions, too. Like promising the alumni secretary you'll come, for one. And

cheering at the game and not calling the Queen a "coed."

O.K. Here's the pitch. Homecoming is September 29—and it's just like the Homecomings we've always had. You can come back to Carlisle, see who's changed and what hasn't, and maybe have a good time, Or you can stay home.

With all the trouble we've gone to, we hope you'll show.

Bridging the Employment Gap

by Howard Figler

It has been said, with much justification, that a chief purpose of the liberal education is to serve as a humanizing force for those who will one day become leaders and have major responsibilities for the welfare of other human beings. There can be little quarrel that the necessity for an education that teaches people to live humanely is more important than ever today, in an age of rampant technology and disintegration of many values which once were considered universal.

However, liberal arts colleges have a problem today that they have seldom before had to confront. This new problem centers around the difficulty that liberal arts graduates are having in their climbs up the ladders of employment to positions of responsibility. In an era that witnesses more and more specialization of labor, the liberal arts graduate often discovers that the first step on this ladder is a long and uncertain one. Employers may be quicker

to hire the new graduate who has some specific skills, vocational preparation, or previous work experience.

When faced with demands for job skills or experience, today's liberal arts graduate often wonders what his degree will be worth when he is competing for available jobs. The graduate's uncertainty is really not warranted. In fact, a strong case can be made for the long-run superiority of the liberal education. As jobs change rapidly and often turn inside-out within 5 to 10 years, the liberally educated individual is far better able to cope with change and adjust his abilities to meet new job requirements. Increasingly, jobs call for inter-disciplinary viewpoints, and it is the liberal arts graduate who is ordinarily best schooled in the ability to look at a problem with larger vision and a knowledge of several disciplines.

Thus, we must reeducate those graduates who feel their talents are not wanted, and remind them that the liber-

al education has its long-run merit that will overshadow the short-run deficiency of job "skills" in employment markets.

However, before we can talk with students about their employment potential, it is necessary to give them a nodding acquaintance with the world of work, which many of them seriously

Since 1970, Dr. Figler has been the Director of Counseling and Placement at the College. His recent textbook, Outreach in Counseling, was published this year, co-authored by alumnus David Drum'64, who is the Director of Counseling at the University of Rhode Island. Much of Dr. Figler's text is based on his upcoming article in the 1973 Journal of College Placement. The article is entitled "PATH: A Vocational Exploration Program for Liberal Arts Students."

lack. For this purpose, the College plans to bring into being the "Extern" Program. Modeled after a currently successful program at Swarthmore College,* the Extern Program will seek to bring undergraduate students into contact with alumni of the College who are employed in a variety of professional fields. Through first-hand exposure to a particular vocation for one, two, or more weeks at a time, the student will gain the following benefits:

- ▶ Direct participation in the activities, problems, and life style of people who practice a particular vocation;
- ▶ An opportunity to observe an individual at work and see how he reacts to the demands and rewards of the position;
- ▶ An opportunity to question people in the vocation about their reasons for choosing their work, the ways in which they would like to change it, etc.

In order to put the Extern Program into operation, it will be necessary to recruit a number of alumni who represent a wide variety of vocational areas. It is expected that most of these alumni would be located within 200 miles or less of the College, so that most interested students would have their homes reasonably near to potential sites of their Externships.

Beyond the immediate benefits of learning about an occupation first-hand, the student in an Externship gains the more important benefit of developing contacts with people in the field that interests him. It is widely understood that knowing a few people in a vocational field can help the individual to meet many others. Since the Extern Program would introduce a student to professional people early in his college years, it would give the student sufficient time to develop a succession of

vocational contacts before he graduates.

It is this link between the towers of academic learning and the pragmatic world of employment which is so necessary to the liberal arts student today. Thus, Extern bridges a vital gap between the student who is capable of and desirous of leadership roles and the occupational opportunities which can await him.

As the competition for leadership positions increases with the expanding pool of college graduates, it will be necessary for the liberal arts colleges to provide this link between the college experience and the real world of problem solving. Since we recognize that the liberal education has lasting value, and that it is the only educational program which addresses itself to universal problems and the human condition, liberal arts colleges must do what is necessary to maintain the strength of the liberal education and enable the graduate to move without great difficulty into positions of responsibility.

It is precisely because the liberal education is *not* training people for vocations that it provides the student with a preparation of even greater value in the job marketplace. Because the liberal education is not time-specific or content-specific, it is an education that can be applied regardless of the employment context in which it may be put to use.

The liberal arts student is taught to bring an orderly thought process to any learning situation. He is taught to understand problems not as technical matters (how to do it), but as human matters (what will this mean to the people who are affected).

These qualities will not wither when the nature of a job changes or the problems of an organization are radically altered. The disciplined mind that is orderly yet creative and open to experience will cope with newness and uncertainty. The emphasis in the liberal education upon effective communication will enable the graduate to

deal with breakdowns in human interrelationships, which are acknowledged to be the thorniest of problems in any kind of organization.

For an employer who is far-sighted enough to recognize the value of the liberal education, it seems clear that the liberal arts graduate is his best bet to develop into a person who can assume a leadership role. It is the educated whole person who will be able to adjust his thinking in the face of rapid social change, who will be able to communicate effectively with a wide variety of people, and who will be versatile enough to occupy many job roles.

Many employers will say that the liberal arts graduate is a bad risk for employment, because he or she is likely to resign for a place in graduate school within a year or two. While it is true that many liberal arts graduates attend graduate school immediately after receiving their B.A. or B.S. degrees, and many others intend to pursue further study at a later time, employers should view this as an asset rather than a liability, and a challenge to attract these better educated people to return to their organizations once they have completed higher education. The more enlightened companies in private industry actively encourage their employees to gain advanced degrees, knowing that many of them will bring their expanded knowledge back to the company and help it to prosper.

There is a strong tendency among many employers to regard education as *training* for specific employment responsibilities. This attitude is perhaps easy to understand in the light of an economy which calls for much division of labor and specialization of work, but the hunger for specialization of labor carries with it the danger that employers will overlook graduates who are broadly educated, and whose talents cannot easily be classified into technical job descriptions or specifications.

We must resist the temptation to classify all educational programs into job

* This program is patterned after the Extern Program which was initiated recently at Swarthmore College by Ms. Judith Katz, Director of Career Planning.

credentials, in order to satisfy what employers say they need. If we believe that the liberally educated individual can offer intangible qualities that have value to organized employments, then we should be convincing our liberal arts graduates of this viewpoint. The liberal education is the last significant holdout against the credentialized society.

In a growing technocracy where the Ph.D. is increasingly referred to as a "union card," and the resume filled with degrees awarded, training acquired, and articles published, is used as the primary tool for evaluating a person's job competence, the liberal education is noteworthy because its value cannot be reduced to a piece of paper, a credential, or a measurable unit of job proficiency.

The Missing Link

Most readers will observe that the erosion of job opportunities for liberal arts graduates is real enough, but many of these same readers will staunchly defend the value of the liberal education. Thus, the Dickinson graduate of 1950 will maintain that the 1972 graduate could probably do many of the jobs in private enterprise, if he were given the opportunity to do so.

Very often the missing link between the Dickinson graduate and desirable employment is "experience." Employers want it, and B.A. or B.S. graduates don't have it. When an employer says that he would prefer not to hire a liberal arts graduate, what he really means is

that he seldom hires inexperienced liberal arts graduates.

Graduates of Dickinson and similar colleges sometimes consume 3 to 5 years getting over the "experience" hurdle, before they can obtain positions offering any challenge or responsibility. These are hard and sometimes bitter years for the graduate who has left Dickinson with high aspirations and then discovers few places where it is possible to get started with his life's work.

The Extern Program

Rather frequently, the distance between the liberal arts graduate and the employer is a result of mutual antipathy. The employer has little patience with those he views as campus idealists, and the graduate has little affection for those he imagines to be hard-nosed, unfeeling, and bureaucratic.

Much of this distance stems directly from the fact that employer and student very seldom cross each other's paths. Other than cooperative work/study arrangements (which are unlikely to be found at liberal arts colleges), and some off-campus programs, a student has little occasion to visit an employer during his four years at college.

In such circumstances, we might say that "unfamiliarity breeds contempt" and that the liberal arts graduate is unable to get himself hired because he is such a total stranger to the offices of businessmen. Like a visitor from another country, he has great difficulty translating the language and adapting to the new environment. Because he is

unaccustomed to the ways of the employer, the graduate is uncomfortable, and his discomfort leads him to avoid embarrassing moments. Such attitudes simply reinforce the employer's belief that an inexperienced, untrained college graduate is a hiring risk. Hence, in some cases, the graduate may lose a job, not due to lack of experience, but due simply to an utter inability to relate to an employer on a personal basis.

For many Dickinson graduates today, law, medicine, or teaching are the only vocational options with which they have any familiarity. Thus, if these vocations are either undesirable to the graduate, or he fails to gain entry, the graduate is confronted with a decision vacuum. He may know the names of certain vocational areas, but this knowledge is not fortified by any realistic understanding of what a newspaper reporter, museum curator, social worker, insurance agent, or city manager actually *does* from one day to another.

If it is true that many students are grossly unfamiliar with employers and their needs, and that this unfamiliarity makes it nearly impossible for the graduate to make contact with employers once he has completed his education, then the Extern Program can help to remedy the problem by educating students about a variety of vocations. Furthermore, it can provide the student with some realistic expectations about the world of work, and thus enable him to develop plans during the college years which will lead toward employment goals.

The EXTERN PROGRAM needs alumni support. Many students have already signed up to participate in the program, and only through the alumni can it ever get off the ground.

The first externs will be available in January, during the Christmas vacation. The next group is scheduled for March. If you are in a position to help, we encourage you to write to the Alumni Secretary, Dickinson College, Carlisle, Pa. 17013 to offer your support.

Statistics

ENGAGEMENTS

- 1962—Dr. JOSEPH F. LIPINSKI to Burnet Barnes Sumner. An August wedding is planned.
- 1968—JOHN N. RHINE to Martha V. Schaper. A September 8 wedding is planned.
- 1969—LYDIA W. L. TAGGART to John P. Auer. An August wedding is planned.
- 1970—RAYMOND J. HUDAK to Patricia

- J. Guth. An August 4 wedding is planned.
- 1970—RICHARD A. KITTLE to Karen S. Kuhn. A September wedding is planned.
- 1971—DONALD S. SHAMEY to Mary Allsopp. An August 11 wedding is planned.
- 1972—WALTER H. OHAR to Jill Ann Musika. An August wedding is planned.

- 1972—DARBY MACKENZIE to Joseph E. Line. An October wedding is planned.
- 1973—KAREN S. KING to Michael D. Keith. A December wedding is planned.

MARRIAGES

- 1959—ADRIAN I. BRADFORD to Anne Stroud on May 19.
- 1960—CARL LIZZA, JR. to Pamela M. Abrams in June.
- 1961—NANCY JEAN NEWELL to James Loren Johnson on July 7.
- 1965—BARRY J. NACE to Andrea M. Giardini on April 28. They reside in Silver Spring, Md.
- 1966—Dr. STANLEY R. GOLDMAN to Jerilyn Miller Gherardini on March 14. They reside at 350 Mill Street, Hershey, Pa.
- 1968—JEFFREY R. BLANK to Patricia R. Neidrauer on June 10.

Parents' Day. October 13

- 1968—Dr. GREGORY M. ASNIS to Lauren Chorney on June 24.
- 1968—Captain WILLIAM L. TRAFICANTI to Eileen A. Kahr. They reside in Europe.
- 1969—PATRICIA A. DeVOE to Arthur F. Hyder on March 10. They reside in Silver Spring, Maryland.
- 1969—SERENA MILES to P. P. O'Shaughnessy. They reside at 1203 Cathedral Street, Baltimore, Maryland 21201.
- 1969—WILLIAM C. HUMPHRIES to Cynthia G. Land on June 2. They reside at 125 Main St., Huntington, N.Y. 11743.
- 1969—LYN COSTENBADER to Robert T. Gradoville on May 12. They reside at 311 LaSalle Street, Duke Manor 9-C, Durham, N. C. 27705.
- 1970—RONALD T. MARTIN to 1973 DOROTHY M. PITTMAN.
- 1971—ALBERT L. HAMPSON, 3d to ELISE J. GELLER on August 19, 1972. They reside at 1207 North Maxwell Street, Apt. 308, Allentown, Pa. 18103.
- 1971—GEORGE K. HOLIDAY to JUDITH A. BRESEL in June.
- 1971—HENRY S. LAIRD to MARTHA E. QUAY on January 6. They reside at 431 North Pleasant Street, Apt. 210, Amherst, Massachusetts.
- 1972—Lt. RODNEY E. KEEFER to 1973 DEBORAH McKAY on June 10. They reside at 24-4 Losson Garden Drive, Cheetowaga, N.Y. 14227.
- 1972—HOLLY R. MOREMEN to Steven A. Hultgren on June 2.
- 1972—ROBERT TURK to YVONNE CHARTER on August 26, 1972. They reside in Owings Mills, Maryland.
- 1972—KATHERINE A. WHITE to Arthur B. Carey on April 14. They reside in Philadelphia.
- 1972—NANCY I. BURN to Bruce R. Vanzandt on June 10.
- 1972—SANFORD B. WEINBERG to Janie Beth Spelton on May 20. They reside in Ann Arbor, Mich.
- 1973—DENNIS C. GESSER to MARCIA L. HEAPS on May 12. Their address is 350 LeJeune Drive, Greensburg, Pa. 15601.
- 1973—CAROLYN A. HUSSEY to Joseph Bourdow on June 16. They reside at R.D.F. #1, Staunton, Va. 24401.
- 1973—STEVEN L. ALDINGER to Christie A. Dunkleberger on June 2. They reside in North Plainfield, N.J.
- 1973—DAVID M. DUNDORE to Karen Bruner on June 30. They reside at Apt. 414, First St., Carlisle, Pa. 17013.

BIRTHS

- 1959—To Mr. and Mrs. RONALD M. NADITCH, a daughter Robyn on July 16, 1972.
- 1960—To Dr. and Mrs. ROBERT B. ORT, a daughter Jill Amy in October.
- 1961—To Dr. and Mrs. Ronald C. Cotner (ANDREA LEE ADAMS), a daughter Jennifer-Lee on December 12.
- 1961—To Mr. and Mrs. RICHARD TREVLYN (LINDA GRAINGER '63), a son Drew Robert on May 7.
- 1961—To Mr. and Mrs. JAMES BARTOLI, a son Carl on June 4.
- 1962—To Mr. and Mrs. DAVID MEADE, a son David Custis, Jr., on February 3.
- 1962—To Mr. and Mrs. Vincent Guarrera (PATRICIA CARDINALI), a son Matthew Vincent on November 17.
- 1962—To Mr. and Mrs. GUY M. SELHEIMER (CHRISTINA SCHMIDT '65), a son Matthew Dickinson on March 28.
- 1963—To Dr. and Mrs. DON C. WEISER, a son Jeffrey Lawrence.
- 1963—To Mr. and Mrs. ROBERT T. DONOHUE (NANCY WILSON '66), a son Michael Owen on March 14.
- 1963—To Capt. and Mrs. Robert E. Snyder (JERRILYN BINGAMAN), a son Robert Engel, Jr., on December 13, 1972.
- 1963—To Mr. and Mrs. WHITNEY B. SMYTH, a daughter Laura Helen on October 1, 1972.
- 1963—To Mr. and Mrs. K. E. Evans (JOAN SPICER), a son Gregory John on September 25.
- 1963—To Dr. and Mrs. DONALD R. BUXTON, JR., a son Douglas Hunter on November 24.
- 1963—To Mr. and Mrs. JOHN C. HENDRICKS by adoption, a son Karl Erik born April 18.
- 1964—To Mr. and Mrs. Robert P. Warren (PATRICIA STERLING), a son Robert on September 7, 1972.
- 1964—To Mr. and Mrs. JAMES H. WOODRING (BETSY JONES), a son James Carleton on December 9, 1972.
- 1964—To Mr. and Mrs. PAUL M. SHOWALTER, JR., a daughter Larisa Hertha on August 8, 1972.

A portrait of him was commissioned by the bar association and presented by its president, THOMAS BIETSCH '41, to Judge CLINTON R. WEIDNER '37, who accepted it on behalf of the Court of Cumberland County.

1935

LOCKWOOD W. FOGG, JR. has been appointed general counsel of the Reading

Old Guard

Two "old guard" alumni have retired this year, both staffers in the Communications and Development Office. The two retirees are Roger Steck '26 and R. Wallace White '29.

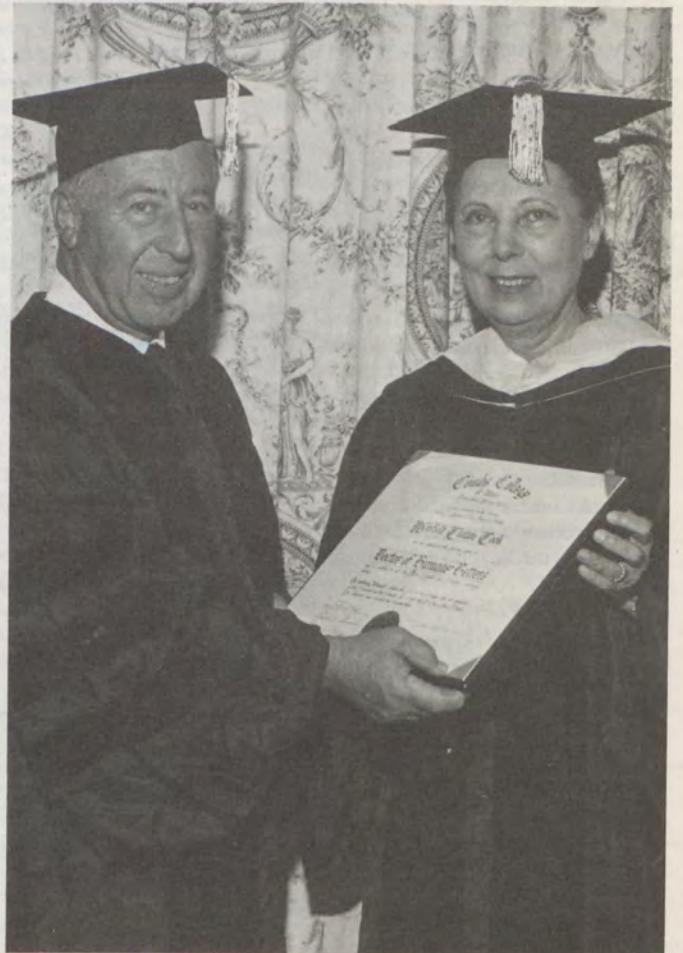

For the past 24 years, Steck has directed the College's News Services, recently heading the bicentennial publicity campaign during the Anniversary celebrations. He began his career in news reporting with the Carlisle *Evening Sentinel*, where for twenty years he was City Editor. Steck came to the College in 1948, where he has remained until his retirement July 1.

Steck has been awarded the Christopher Medal for his report saluting a Navy veteran's struggle to get through College, while shouldering family and financial responsibilities. Another article, "The Mischievous Future President," a biography of Buchanan's days at the College, was published in Paul Beers' *The Pennsylvania Sampler*. Steck looks forward to another career, however—he will remain executive director of the Hamilton Library and Cumberland County Historical Society.

White's retirement in July was his "second retirement," since he retired from the Army Signal Corps in 1961. At the time, he was Deputy Post Commander at Fort Monmouth.

After his graduation from the College, White entered Dickinson School of Law, where he earned a law degree in 1931. He practiced law in Dunmore, Pennsylvania until he entered the Army in 1942. When he retired as a colonel in 1961, White entered the service of RCA in their International Division and spent several years abroad. Later, he became executive of the Cumberland County Association for Retarded Children, a move which brought him back to the Carlisle area.

White joined the College's staff in 1967 as Director of Planned Giving. Since that time, he had been working with alumni in developing gifts, trusts and life income agreements.

Winfield Cook '32 receives honorary degree from Dr. Helen Brown, President of Combs College.

Dr. George R. McCahan '31

Railroad Company and also holds positions with subsidiaries of that company: president and director of Reading Dispatch, Inc.; director of the Port Reading Railroad Company; director of Rydal Equipment Company and director of Trenton-Princeton Traction Company.

1936

GEORGE J. McCLAIN, Meshoppen, Pa., is a district salesman with Tilo Company, a subsidiary of Reynolds Metals Company. During 1972, he won three awards for the most entered sales in Northwestern Division, comprising Northeastern Pennsylvania and Western New York.

1937

Obituaries

1905 The Alumni Office recently learned of the death of **WILLIAM L. BEYER, JR.**, Atlanta, Georgia. He was a member of Kappa Sigma fraternity.

1908 **HENRY L. SEAMAN**, Hamburg, Pa., died on December 7 at the age of 87 years. He was president of Robinhold & Company, manufacturers of knit underwear. He was a member of Sigma Chi fraternity. A son survives him.

1910 **IRA S. HUBER**, Millersville, Pa., died on April 28 at his home at the age of 87 years. At the age of 16, he was a teacher in a one-room school house at McCall's Ferry and the following year he taught at Red Hill School in Martic Township. He graduated from Millersville Normal School in 1907 prior to entering Dickinson. Mr. Huber also was an instructor of physics at Pennsylvania State University and at the Clark School for Concentration in New York City. He taught physics and chemistry in Yonkers High School, Yonkers, N.Y., where he served as chairman of the science department. While working toward his doctorate in chemistry at Columbia University in 1928, he was seriously injured in an accident and forced to end his teaching career. In 1933 he established the Ira S. Huber and Son insurance agency in Millersville. He also served as the borough tax collector and justice of the peace and later served as presi-

dent of Penn View Development. He is survived by his wife, a son, three grandchildren and one great-grandchild.

1910 Dr. **JOSEPH S. VANNEMAN**, husband of **MARY ROBLEY VANNEMAN**, died in February at the Cape Cod Nursing Home, Buzzards, Massachusetts, after a lingering illness at the age of 85 years. A graduate of Johns Hopkins Medical School, he served as a resident physician at Princeton University Infirmary. Except for a period during World War I when he served in the Army Air Force medical service, he conducted a general practice in Princeton until his retirement in 1952. He had served as president of the Mercer County Medical Association and chief of staff of Princeton Hospital, which he helped to found and organize. He held memberships in many professional and civic organizations. In addition to his wife, he is survived by three daughters, six grandchildren, a brother and five great-grandchildren.

1913 Mrs. **HILDA LAURETTA STAUFFER GORDON**, Upper Darby, Pa., died on March 11 after an illness of several months at the age of 81 years. She is survived by a daughter, Mrs. Caroline Gordon Dosker, with whom she resided, and three sons, **John, THOMAS '49,** and **IRWIN, '54.**

1913 The Alumni Office recently learned of the death of **JOHN W. VANCE**, Atlanta, Georgia.

1914 The Alumni Office recently learned of the death of **ARTHUR B. JENNINGS, JR.**, Minneapolis, Minnesota, in June 1972. A member of Alpha Chi Rho fraternity, he was a retired educator.

1915 **HELEN B. NEYHARD**, a former resident of Carlisle, Pa., died in the Polyclinic Hospital, Harrisburg, Pa., on May 22 at the age of 80 years. For the past three years she had been a resident of Bethany Village Retirement Home in Mechanicsburg. A retired school teacher in the Carlisle District School System, she also served for a period of time as the Home and School Visitor in the school district, and for many years prior had been director of religious education

in Syracuse, N.Y. Miss Neyhard was a lifelong member of Allison United Methodist Church and the Altruistic Sunday School Class. A life member of the General Alumni Association, she was a member of Chi Omega and a graduate of Columbia University Graduate School. She is survived by a sister, four nieces: **VIRGINIA CLARK CHILTON '36,** **EVELYN CLARK CRAIG '39,** **MARY CLARK McKNIGHT '44** and Mrs. Helen C. Hawkins, and a nephew.

1916 **GEORGE BRADLEY, SR.**, Wenonah, New Jersey, died on August 28, 1972 at the age of 80 years. He was a member of Alpha Chi Rho fraternity. In addition to his wife, he is survived by five children.

Trustee Dies

Glenn E. Todd '12, a member of the Board of Trustees since 1950, died on July 4 while in treatment at the Carlisle Hospital. Mr. Todd, born in 1890, was 83 at the time of his death.

Mr. Todd's business interests included a long-time partnership with his brother in the Todd Carpet Manufacturing Company, and recently in the Farmers Trust Company, where he was serving as vice president of the Board of Directors.

Mr. Todd was also a member of the Board of Directors at the Carlisle Hospital and was a regent at Mercersburg Academy.

As a dedicated Sigma Chi, Mr. Todd served his fraternity in many capacities through the years. He was a president of the Harrisburg Area Alumni Chapter and a treasurer of the Omicron Chapter. For his continuous and devoted fraternal service, Todd was elected to the Order of Constantine, Sigma Chi's highest honor.

Said Dr. Rubendall of Todd's long-time friendliness to his alma mater, "Glenn Todd was one of the most loyal, faithful and generous members of the Board of Trustees, who enjoyed the deepest affection of all who knew him." Mr. Todd is survived by his wife, Mary Line '23 and a brother, Roger '15.

1918 The Rev. GEORGE C. KERR died on April 26 in the Polyclinic Hospital, Harrisburg, Pa. A resident of Bethany Village Retirement Home, he served many charges before his retirement from the active ministry. He established both the Scranton and Harrisburg branches of Goodwill Industries. From 1960 to 1961 he served as an exchange Methodist minister in London, England. He and his wife moved to Bethany Village in 1970, following his retirement from Goodwill Industries and the ministry. He also spent a year as a member of the Pennsylvania Council on Alcoholic Problems in Pittsburgh. In addition to his wife, he is survived by a daughter, five sisters and two grandsons.

1921 Dr. CALVIN B. RENTSCHLER, surgeon of Reading, Pa., died on May 20 at the age of 76 years. Prior to his retirement last year, he had been chief of surgery at the Reading Hospital for 35 years. He received his M.D. from the University of Pennsylvania in 1924, was a Fellow at Mayo Clinic from 1925 to 1928, and received an M.S. in surgery from the University of Minnesota in 1919. He was a life member of the General Alumni Association and of Sigma Chi fraternity. Dr. Rentschler wrote numerous surgical articles for professional journals. A former diplomat of the National Board of Medical Examiners, he was a member of the American Board of Surgery and in 1951 received the University of Pennsylvania Alumni Award of Merit. He is survived by his wife, three daughters, two sons and a twin brother, Dr. EDWIN B. RENTSCHLER, '21.

1921 The Alumni Office recently learned of the death of JOHN A. LORIMER, of

Philadelphia, Pa., on October 8, 1972. He was a member of Sigma Alpha Epsilon fraternity.

1925 Mrs. HELEN WIENER SMETHURST, Holmes Beach, Florida, died in March at the age of 69 years. Prior to her marriage, she was a resident of Carlisle. She was a retired teacher. A life member of the General Alumni Association, she was a member of Chi Omega Sorority. In addition to her husband she is survived by two sons, William and RICHARD '55; a sister, Mrs. AMELIA W. BLOOMFIELD, '16, and three grandchildren.

1926 ROBERT E. CARTER, Mt. Holly Springs, Pa., died recently at the age of 70 years. He is survived by his wife.

1927 Rev. J. FREDERIC MOORE, McConnellstown, Pa., died on February 6 at the age of 70 years. He was a life member of the General Alumni Association. In addition to his wife, he is survived by two sons.

1928 SAMUEL LICHTENFELD, attorney of Drexel Hill, Pa., died on October 12, 1972 at the age of 68 years. He was a member of Phi Epsilon Pi and a graduate of the Dickinson School of Law. In addition to his wife, he is survived by three children.

1929 Mrs. MARY FINLEY CONRAD, Lilly, Pa., died on June 10 at Mercy Hospital, Johnstown, Pa., at the age of 66 years. Following graduation from the College, she taught for six years at the Lilly High School before becoming a social worker in Dauphin County for two years. She returned to teaching in 1944, retiring in 1972. She was a member of several education associations and civic organi-

zations and had served as chairman of the Johnstown Regional Blood Center since its establishment in 1949. Mrs. Conrad served 35 years as the Lilly correspondent for the *Johnstown Tribune and Democrat*. She is survived by her husband, two sons and two daughters.

1933 E. GERALD MILLER, Duncannon, Pa., died on March 12, 1972 at the age of 61 years. He is survived by his wife.

1933 CARL INGERSOLL, Berlin, N.J. died suddenly on March 1 at the age of 61 years. He was purchasing agent and traffic manager for Owens-Illinois Glass Company. A life member of the General Alumni Association, he was a member of Beta Theta Pi Fraternity. In addition to his wife, he is survived by two children.

1935 J. GIFFORD SCARBOROUGH, Elkton, Maryland, died in 1968.

1939 Dr. DONALD P. BLOSER, Enola, Pa., died on March 17 following a heart attack at the age of 56 years. A graduate of Temple Medical School, he served in the Army Medical Corps from 1944 to 1946, after which he became a general practitioner in Enola in 1947. He served as school physician in East Pennsboro Township for 25 years. A life member of the General Alumni Association, he was a member of Zion Lutheran Church, the Pennsylvania and Dauphin County Medical Societies, the American Legion and VFW. In addition to his wife, he is survived by two sons, two daughters, his mother, two brothers and two sisters including Mrs. PAULINE B. GIBSON '40.

1948 WILLIAM J. CUDGING, JR., died on May 8 at

the Harrisburg Hospital at the age of 47 years. A deputy attorney general of the Pennsylvania Commonwealth Department of Labor and Industry, he was a veteran of World War II, a past president of the National Security Association; a past VFW Commander and a member of the Holy Family Roman Catholic Church. He is survived by his wife, a son and his mother.
