BREAST CANCER.

The numbers are in and they are staggering. 1 in 9 women will be diagnosed by the age of 85.
An estimated 182,000 new cases are reported in the U.S. each year. Approximately 2700 deaths
per year occur in PA alone. Breast cancer incidence rates for women have been increasing about
.2%

All reports show that **EARLY DETECTION** is crucial in **FIGHTING** this disease.
While these numbers and statistics are crucial in understanding this crisis, we must not forget
the human side of this disease - those women and men whose lives have forever been changed
by Breast Cancer. Some of them are still with us. Others are not. And in remembering them,
we must also take the time to gather together and celebrate their lives and ours.

Please join us for a very special evening of music and celebration to...
